

## SUMMARY

---

My name is Aleksandra Ujvari. I am a full-stack software developer, currently enrolled at Microverse, a remote software development school, where we learned remote pair programming.

I earned a badge for finishing :

- Front-end development: ReactJS | NextJS | Angular | JQuery |
- Back-end development: NodeJS | Ruby | Ruby on Rails |
- Databases: Postgres | Postgresql | MySQL |
- Styling: Styled-components | CSS-in-JS | Bootstrap
- Tools and Methods: Git | GitHub | Heroku | Netlify | Jest |
- Soft skills: communication, remote collaboration, pair-programming, teamwork, mentoring, problem-solving, and critical thinking.

Prior to becoming a full-stack software developer I was the owner of a cloth workshop for 15 years. I worked every day with different people and organized work so we can meet deadlines. After graduating with a digital marketing degree, I decided to start learning more about the development topics I'd used to create sites. I am also a freelance designer with a demonstrated history of working in the information technology and services industry.

---

## SKILLS

---

**Front-End:** Javascript, React, Redux, jQuery, HTML, and CSS3

**Back-End:** Ruby, Rails, Ruby on Rails

---

## EXPERIENCE

---

### HIGHLIGHTED PERSONAL PROJECTS

Full Stack Web Developer	Remote May 2022-December 2022
--------------------------	----------------------------------

**To-do List**- This is a website for creating to-do tasks. A "to-do list" is a tool that helps you organize your day

- Created with: (HTML/CSS, JavaScript, ES6, and Webpack)
- Link to project live demo: <https://digia3d.github.io/To-Do-List/>
- Link to source code: <https://github.com/digia3d/To-Do-List>

**Awesome books** - This project will be a simple website that allows users to add or remove books from a list

- Built with: (Html/CSS, JavaScript, ES6)
- Link to project live demo: <https://digia3d.github.io/Awesome-Books-ES6/>
- Link to source code: <https://github.com/digia3d/Awesome-Books-ES6>

**Conference Page** - This is a conference page project from the end of the first module in Microverse. It represents the website of the Digital Marketing Agency.

- Created with: (HTML, CSS, and JAVASCRIPT, Media Query, Web hint, Stylelint, ESLint)
- Link to project live demo: <https://digia3d.github.io/Conference-page/>

- Link to source code: <https://github.com/digia3d/Conference-page>

**Doctor's Appointment-Front End** - This is the backend API for the Doctor's Appointment application. And this project is part of the final project in Microverse.

- Built with: (React, Redux, Ruby on Rails, Postgresql, Stylelint, and ESLint)
- Link to the live demo of the project: <https://doc-appointments.netlify.app/>
- Link to the source code: [https://github.com/digia3d/Doctor-Appointment\\_front-end](https://github.com/digia3d/Doctor-Appointment_front-end)

**Doctor's Appointment-Back End** - Doctor's Appointment is a real-world practical application that allows users to log into a website and view available doctors for appointments. And this project is part of the final project in Microverse.

- Built with: (React, Redux, Ruby on Rails, Postgresql, Stylelint, and ESLint)
- Link to the live demo of the project: <https://book-doctors-appointment.onrender.com/api-docs/index.html>
- Link to the source code: <https://github.com/digia3d/Doctor-Appointment-API>
